+1 "Day Out of Time" (7/25) celebration of Peace through Culture, observed globally.

## The Elegant Simplicity of the New Time.

The Thirteen Month/28 day calendar is a perpetual, harmonic calendar. It is a genuine solar-lunar calendar which measures the Earth's orbit around the sun by the lunar cycle of 28 days. Thirteen perfect months of 28 days $=52$ perfect weeks of 7 days $=364$ days. The 365th day is called the Day Out of Time because it is no day of the week or month at all. This day which falls on the Gregorian correlate date of July 25 is a day for forgiveness and the artistic celebration of life and freedom.

The synchronization or new year's date of the 13 Month calendar is July 26, and corresponds to the rising of the great star Sirius. This makes the 13 Month Calendar a tool for harmonizing ourselves with the galaxy.

One of the great advantages of the 13 Month Calendar is that day/date calculations are amazingly simple. The first day of every Month is always the first day of the week. The last day of every Month is always the last day of the week. The Gregorian calendar makes day/date calculations very difficult because the months are of unequal measure so the dates and days of the week vary from month to month and year to year. The Gregorian reference dates are found at the upperleft of each 13 Month date. Find your birthday, every year it will always be on the same day of the same 13 Month week.
he current twelve month calendar is made of ionths of unequal measure:

1 days, 28 or 29 days, 31 days, 30 days, 31 ays, 30 days, 31 days, 31 days, 30 days and 1 days.
you have a crooked standard of measure, nd follow it because your parents were also )llowing it, isn't it still crooked?
ime is the atmosphere of the mind, a ientally perceived phenomenon. So, if you ave a crooked or inaccurate measure of me , you will create a crooked mind. Change le calendar. Change the time. Change your lind.
his is not the first time people have used a 3 Month calendar. The Druids kept a "tree" alendar, a count of 13 months of 28 days ach, plus one day. They were not the only nes to keep such a calendar, the Incas, ncient Egyptians, Mayans, and the

| Each Month has four seven-day weeks. |  |  |  |  |  |  | 'olynesians all kept a 13 month/28 day count. he Lakota Indians kept a 13 month/28 day ount based on the keya, or turtle, since the urtle has 13 scales on its back. Modern cience has discovered that even dolphins eep time with 13 sets of 28 grooves along leir teeth!

## Did You Know ...

... The moon circles the earth thirteen times in one year?
... In the current global standard calendar, a month doesn't correspond to one natural cycle?
... The word "calendar" comes from the Roman word, "calends", which was the name of the account book, the book recording monthly debts and bills?
... September means seven, but is the ninth month?
... July and August are named for Julius and Augustus Caesar?

Current Twelve Month Calendar. Months have unequal units of measure.

If today is Tuesday, June 1st, what day of the week will July 1s be? August 1st? November 1st?

If you were to build a house, wouldn't you use a ruler of equal measure?

The 28 day calendar is a Radial Matrix!
The sym of the first and last day equals 29. If you progress inwards, you will
notice that each day paired with its opposite equals $29(27+2)$, $(26+3)$, etc.

Every month has the same number of days!
13 months $\times 28$ days $=364$ days +1 Day Out of Time $=365$ days 13 months $\times 4$ weeks $=52$ weeks
